

FINANCIAL INFORMATION

The total cost of the capital project is \$4,500,000. This project has been designed to best take advantage of the District's high state aid ratio combined with the availability of funds from prior projects that will be paid off once this new project starts. **NO ADDITIONAL TAXES WILL BE NEEDED TO FUND THE PROJECT.**

The majority of the costs will be covered through the New York State Building Aid program. It is anticipated the State's share of the project will be \$3,060,000. The remaining local share of the project will be covered through \$450,000 of capital reserve funds, \$740,000 of guaranteed energy savings to be achieved through the energy performance improvements within the project, and \$250,000 of debt falling off from past projects that the District has finished paying off. **The proposed project will result in no tax increases.**

ZERO TAX LEVY!
ZERO TAX IMPACT!
